

# Which social-emotional skills would help your students do better in school – now and in the future?

Whether it's arithmetic, grammar or resiliency, the skills students learn in the elementary grades provide an important foundation for their academic success in middle school and beyond. You know students can only go on to do well in algebra if they have a solid grasp on fractions. Likewise, students who are resilient possess the skills to succeed academically.

There are plenty of ways to know whether your students have mastered fractions but how do you know which resiliency skills are in need of development? The answer is clear – by assessing students' resiliency using ScholarCentric's new *Success Highways* Resiliency Assessment for grades 3-5.

The Resiliency Assessment is based on research led by Boston University Professor V. Scott Solberg that has shown:

- Among matched groups of students, resiliency is the key factor in determining why one group succeeds academically while the other does not.
- Six interrelated resiliency skills can be measured and taught.
- When students' resiliency increases, their academic performance improves, along with their attendance and behavior.

## The Six Resiliency Skills Assessed by *Success Highways*

Valuing education  
Academic confidence  
Connectedness  
Stress  
Health and well-being  
Intrinsic motivation

# Early identification provides an ounce of prevention

ScholarCentric's *Success Highways* program has helped middle and high school educators across the country identify at-risk students even before warning signs appear for nearly ten years. A new elementary version of the *Success Highways* research-validated Resiliency Assessment is now available for use with students grades 3-5. Elementary educators can use the data to identify the resiliency skills their students most need to focus on in order to build a solid foundation for academic success in later grades.

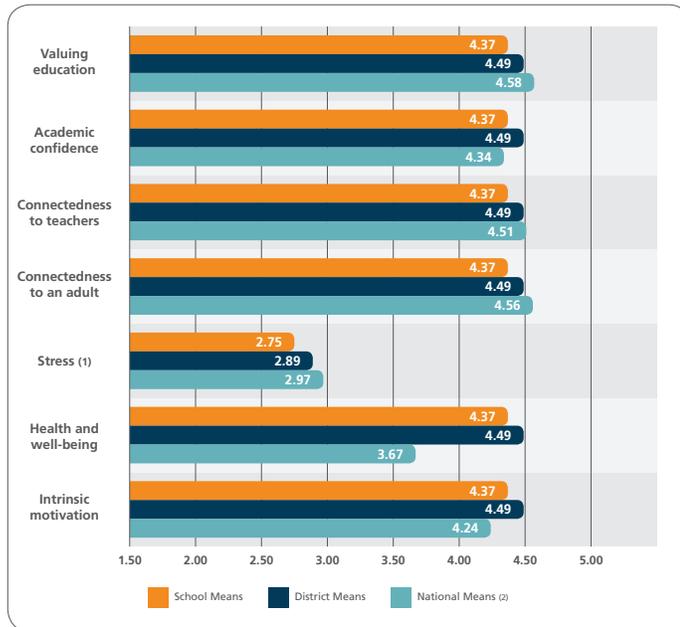

The 30-40 minute online survey provides reading prompts for emerging and struggling readers. Each question is designed to reveal how students think and feel about

themselves, their future, school, and home. The resulting data provides a complete picture of the “whole” student so that educators can provide interventions that truly target the issues students need help with to improve academic performance, attendance, and behavior for years to come.

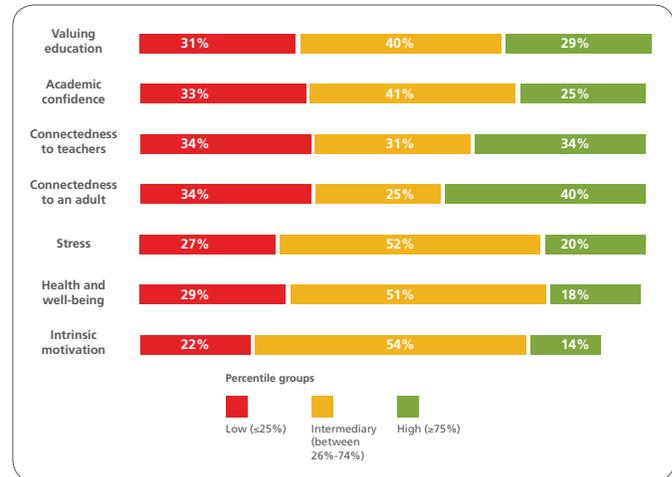

Your Resiliency Assessment report provides:

- Root cause analysis
- Trend analysis to inform school culture and climate
- Data and reports by student, school, and district
- Support for LMS and SIS integration

## Comparison of School Results to District and National Results

## Resiliency Results by Percent

ScholarCentric also offers professional development to build understanding of the essential role of resiliency in student achievement, helping educators create a school-wide culture of resiliency across subject areas. Workshops are available for educators and parents.

## Individual Student Resiliency Results

Student ID	Valuing education	Academic confidence	Connectedness to teachers	Connectedness to an adult	Stress	Health and well-being	Intrinsic motivation
100	High	Low	High	High	Low	High	Low
101	Low	Low	Low	Low	Intermediary	High	High
102	High	Low	Intermediary	Intermediary	Low	High	High
103	High	High	High	High	Intermediary	High	High
104	High	High	High	High	High	High	High
105	High	Intermediary	High	High	High	Intermediary	High
106	Low	Low	Low	Low	Low	High	Low
107	Low	High	Intermediary	Intermediary	High	High	Low
108	High	High	High	High	Low	High	High
109	Low	Low	Low	Low	Low	High	Low
110	Low	Intermediary	Low	Low	High	High	Intermediary
111	Low	High	High	High	High	High	Low
